

☆ EXECUTIVE COMMITTEE DEMONSTRATION BLUEPRINT

Scaling Huntington's Wealth Management Franchise with Existing Headcount

Huntington cannot scale wealth management by asking bankers to work harder. The barrier is physical human capacity against an un-monitorable commercial book. Powered by the **Gemini Enterprise Agent Platform (fka Vertex AI Platform)**, **Huntington Horizon** provides dual-sided capacity leverage—monitoring the entire book, absorbing manual discovery for Commercial RMs, pre-staging onboarding and servicing for Private Wealth Advisors, and safeguarding both taxable cash-out and IRC §1031 exchange liquidity.

\$4.5 Billion

Annual CRE & Mid-Market Payoffs

~78% Flight

Deposits Leaving Within 48–72 Hrs

~7 hrs → 4 min

Commercial RM Discovery Absorbed

80 → 150 Accounts

Advisor Ongoing Capacity Expanded

PART 1: THE CHALLENGE

The Business Problem: A Two-Sided Bottleneck & 1031 Flight

Huntington's commercial book experiences \$4.5B in annual loan payoffs. Each represents an urgent liquidity event. Today, manual bandwidth limitations across both lines of business create an unavoidable deposit leakage point.

SIDE 1: COMMERCIAL RM BOTTLENECK

Commercial Discovery Drag

Commercial Relationship Managers (RMs) are focused on loan origination. They lack the bandwidth to manually hunt for exits across thousands of servicing tickets.

6 to 8 Hours / Deal

Manual time across 3 systems (core servicing, credit vault, CRM) to resolve LLC guarantors, calculate equity, and check tax intent.

- **Un-monitorable Book:** Thousands of payoff requests arrive via PDF from title companies and sit unread in servicing queues.
- **Entity Resolution Gap:** Borrower LLCs conceal living owners; parsing incumbency certificates is manual and labor-intensive.
- **The Title Wire Deadline:** Title companies disburse funds based on seller wire instructions signed days before closing. Without early contact, the wire routes away.

SIDE 2: WEALTH ADVISOR BOTTLENECK

Wealth Onboarding & Ongoing Servicing Drag

Private Wealth Advisors (PWAs) manage full client books (80–100 families). Simply sending them more commercial leads just moves the bottleneck without scaling the business.

80–100 Client Ceiling

Manual onboarding takes 2–3 weeks, and ongoing fiduciary servicing (quarterly reviews, asset allocation tracking) limits advisor bandwidth.

- **Capacity Throttle:** Advisors cannot absorb new multi-million dollar relationships without ongoing fiduciary servicing fatigue.
- **The 1031 Exchange Blind Spot:** Over 50–65% of commercial dispositions execute IRC §1031 exchanges. If funds touch operating accounts, tax deferral is voided.
- **Flight Window Lost:** Proceeds wire out to Wall Street wirehouses or third-party exchange accommodators in 48–72 hours.

The 48–72 Hour Deposit Flight Cliff & Title Wire Routing

§

When a commercial borrower sells an asset, net equity proceeds (\$2M–\$10M+) settle into an operating account. Historical Treasury data proves that **~78% of these funds wire out to competitors within 5 business days** unless an immediate, high-yield, FDIC-insured structure (Max\$aver ICS or 1031 QI Escrow) is pre-staged and delivered to the title company before closing.

PART 2: THE CORE WORKFLOW

How Horizon Solves It: Dual-Sided Capacity Leverage

Horizon does not ask bankers to work longer hours, nor does it fire bankers. Built on the **Gemini Enterprise Agent Platform (fka Vertex AI Platform)**, it introduces an intelligent agentic layer that **absorbs the un-staffable work** across both commercial and wealth operations.

The Scaling Thesis Stated Plainly

"No human team could monitor a \$4.5B payoff book in real time. Horizon monitors all of it, absorbs multi-hour discovery on the commercial side, and pre-stages onboarding and ongoing fiduciary servicing on the wealth side. The same headcount—commercial and wealth—now covers a franchise it physically could not have covered before. That is how Huntington scales wealth management without scaling the org chart."

SYNTHETIC CAPACITY METER (LIVE IN-PRODUCT)

2,140 screened > 6 qualified & staged > ~46 hrs manual discovery absorbed

Zero Net New Headcount Required

DIMENSION	MANUAL BASELINE (TODAY)	WITH HUNTINGTON HORIZON
Book Coverage	Effectively <5% (Humanly un-monitorable)	100% of \$4.5B book monitored in real time via Pub/Sub
Commercial RM Discovery	~6–8 hours per deal across 3 siloed systems	~4 minutes total: Gemini multimodal entity resolution + automated Title Wire Instruction Form
Messy Real-World Pricing	Blocks workflow; requires human analyst to research property	Agentic Proof: Trailing NOI (\$637.5k) capitalized via 7.5% submarket cap rate grounded via Vertex AI Search (\$8.5M value)
IRC §1031 Exchange Routing	0% captured; 100% leaks to third-party QI accommodators	Native 1031 Detection: Automatic routing to Huntington 1031 QI Escrow Custody Account (yielding 4.75%)
Wealth Advisor Intake & Servicing	~4–6 hrs onboarding (2–3 weeks elapsed); capped at 80 clients	~3-day onboarding: Pre-filled KYC/CIP, SEI shell, draft IPS, & ongoing review dossiers expanding capacity to 150 clients
Compliance & Risk	Manual checks; risk of fee-splitting violations or bad credits	Exclusion Sentry Tool: Pass rating (Tier 2), FINRA 2040 100% Shadow Deposit Credit, GLBA Quarantined Consent Gate

§

Institutional Governance: Reg BI & Fiduciary Boundary

Horizon generates **administrative scaffolding only**. It never renders investment advice or suitability determinations. All pre-filled KYC entries, SEI model portfolios, and draft IPS structures require mandatory review and authorship by licensed Series 7/66/CFP advisors before client presentation.

PART 3: DEMONSTRATION BLUEPRINT

The 10-Minute Executive Demonstration Flow

A structured walkthrough demonstrating the exact presenter actions, visible UI feedback, and production enterprise implementation mapping for every step of the workflow.

1

DAY T-14 • 01:30 IN DEMO

Continuous Servicing Queue Ingestion

Horizon Agent

Horizon monitors commercial loan servicing queues (AFS/ACBS). It automatically intercepts an inbound title payoff request PDF from First American Title on *Riverfront Commercial Commons* (\$5,214,800 payoff, 14 days to close).

PRESENTER ACTION

Opens Salesforce FSC shell; highlights live ingestion feed and T-14 payoff request document.

WHAT IS SHOWN IN DEMO

Inbound PDF preview, extracted UPB (\$5,214,800), and 14-day payoff countdown badge.

PRODUCTION IMPLEMENTATION

Google Cloud Pub/Sub event bus ingesting core servicing feeds into Cloud Run microservices.

2

DAY T-14 • 03:00 IN DEMO

Multimodal Entity Resolution & Guarantor Mapping

Gemini 3.7 Flash

Powered by the **Gemini Enterprise Agent Platform**, Horizon inspects raw credit documents (Incumbency Certificate & Guaranty Agreement), resolving Vance Riverfront Properties IV, LLC to **Marcus Vance (85%)** and **Elena Vance (15%)** with pixel-level bounding boxes.

PRESENTER ACTION

Clicks Marcus Vance in Pane 1; triggers multimodal layout analysis on scanned credit vault documents.

WHAT IS SHOWN IN DEMO

Pane 2 household topology map with green bounding-box citations on scanned credit certificates.

PRODUCTION IMPLEMENTATION

Gemini 3.7 Flash native multimodal visual understanding parsing raw TIFF/PDFs directly from BigQuery vault.

DAY T-14 • 04:30 IN DEMO

The "Agentic Proof" Moment: Grounded Valuation & 1031 Strategy

Gemini 3.7 Flash + Vertex Search

The title letter omits the contract sale price. Rather than failing, the agent retrieves Q1 trailing NOI (\$637.5k), grounds the 7.5% submarket cap rate via Vertex AI Search, computes an indicative \$8.5M value (\$2.9M net equity), and verifies IRC §1031 exchange intent.

PRESENTER ACTION

Adjusts the Sale Price Slider from \$8.5M to \$9.0M live; inspects the 1031 Tax Strategy Toggle.

WHAT IS SHOWN IN DEMO

Real-time dynamic arithmetic updating net equity to \$3.35M; source citations linking to appraisal database.

PRODUCTION IMPLEMENTATION

Vertex AI Search grounding regional cap rates; deterministic Cloud Run `CalculatorTool` executing math.

DAY T-12 • 06:00 IN DEMO

Automated Risk & Compliance Screening (Exclusion Sentry)

Deterministic Cloud Run Tool

Before any banker's time is requested, Horizon validates that credit risk is **Pass (Rating 2)** and configures **FINRA Rule 2040 compliance**: RM receives 100% Shadow Deposit Credit on their cost-of-funds scorecard with zero securities fee-splitting.

PRESENTER ACTION

Opens compliance drawer; demonstrates deterministic credit risk checks and non-fee-splitting verification.

WHAT IS SHOWN IN DEMO

Green badges for Pass Rating 2, FINRA 2040 Shadow Credit, and GLBA Quarantined Consent Gate.

PRODUCTION IMPLEMENTATION

Cloud Run microservice enforcing deterministic ECOA/Reg B rules and immutable Cloud Audit Logs.

5

DAY T-12 • 06:45 IN DEMO

High-Value Human Call & Title Wire Form Delivery

Greg Miller (Commercial RM)

RM Greg Miller places a 4-minute warm call: *"Marcus, congratulations on getting Riverfront under contract. Let's make sure that \$2.9M net proceeds works immediately for you upon closing. I'd like to bring in Sarah Jenkins to structure our 4.85% Treasury sweep and send First American Title our verified settlement wire instructions."* Greg clicks **[Approve & Deliver Wire Form]**.

PRESENTER ACTION

Reviews briefing talk track; clicks [Approve & Deliver Wire Form] to generate title settlement document.

WHAT IS SHOWN IN DEMO

Pre-filled Huntington Verified Wire Instruction Form generated as PDF ready for First American Title.

PRODUCTION IMPLEMENTATION

Apigee X API Gateway delivering authenticated payload to title settlement coordination queues.

6

DAY T-8 • 07:30 IN DEMO

Wealth Capacity Leverage: Onboarding & Ongoing Servicing

Sarah Jenkins (Private Wealth Advisor)

The demo toggles to Sarah Jenkins. Horizon does not dump a raw lead. It delivers an **80% pre-staged onboarding package** (KYC/CIP, SEI custodial shell, draft IPS) plus an **Automated Quarterly Review Dossier** template—expanding Sarah's client capacity from 80 to 150 relationships.

PRESENTER ACTION

Toggles Persona Switcher to Sarah Jenkins (PWA view); reviews staged dossier and IPS framework.

WHAT IS SHOWN IN DEMO

Pre-filled KYC/CIP entries, staged SEI shell, draft IPS framework, and ongoing review dossier template.

PRODUCTION IMPLEMENTATION

Apigee X routing to SEI Wealth Platform Gateway; Cloud Spanner persistent household topology.

DAY T-0 TO T+10 • 09:00 IN DEMO

Dual-Path Deposit Retention: 100% Retained at Closing**Client & Treasury Platform**

Path A (Cash Out): On Day T-0, \$2.9M settles directly into Marcus's commercial **Max\$aver Insured Cash Sweep (ICS)** yielding 4.85% with multi-million-dollar FDIC insurance. On Day T+10, \$2.0M transitions to an SEI discretionary family trust, retaining \$900k in commercial liquidity.

Path B (1031 Exchange): If 1031 intent is flagged, proceeds route directly into the **Huntington 1031 Qualified Intermediary (QI) Escrow Custody Account** (yielding 4.75%) during the 180-day window.

PRESENTER ACTION

Shows Day 0 settlement ledger; highlights seamless transition from Treasury ICS to SEI Wealth Platform.

WHAT IS SHOWN IN DEMO

Two-tier retention breakdown: \$2.0M Wealth AUM + \$900k Commercial Deposits = \$2.9M retained.

PRODUCTION IMPLEMENTATION

Core deposit accounting (AFS/ACBS) coupled with SEI Wealth Platform custodial ledger.

Technical Architecture: Demo vs. Target Production

Compare the high-speed prototype monostack built for executive demonstration against the enterprise-hardened production architecture engineered for scale, auditability, and regulatory compliance.

Architecture 1: Working Cloud Run Monostack Prototype (React + Vite + FastAPI)

Standard Cloud Run Monostack: Containerized React 18 + Vite SPA paired with a Python 3.11 FastAPI backend in a multi-stage Docker container deployed on Google Cloud Run. Features native Cloud Run Direct IAP with cryptographic JWT verification, Application Default Credentials (ADC), scale-to-zero idle defaults (`--min-instances=0``), and live integration with the Gemini Enterprise Agent Platform.

PRESENTATION TIER

CLIENT BROWSER

UI MONOSTACK

Salesforce FSC Shell

React 18 • Vite • TailwindCSS • shadcn/ui

Embedded 3-Pane console: Priority Radar, Household Topology Canvas, and Agent Staging Workspace.

INTERACTIVE CONTROL

Persona Switcher

Dual-Persona State Manager

Instant toggle between Commercial RM (Greg) and Private Wealth Advisor (Sarah) proving dual-sided leverage.

MANDATORY ADMIN

Admin Panel & Gear Icon

Slide-Over Sheet • Lucide Settings

Slide-out drawer displaying live telemetry badges and quick links to Brand Kit and Demo Script.

COMPUTE & SECURITY TIER

GOOGLE CLOUD RUN

MONOSTACK HOST

FastAPI Application Server

Cloud Run Container • Python 3.11

Multi-stage Docker container serving static bundle and protected APIs. Bound to ``0.0.0.0:${PORT:-8080}``.

ENTERPRISE SECURITY

Direct IAP + JWT Middleware

X-Goog-IAP-JWT-Assertion

Cryptographic JWT verification against Google public keys. Scale-to-zero defaults (`--min-instances=0`).

DETERMINISTIC TOOL

Calculator & Sentry Engine

Deterministic Python Services

Executes UPB per diem interest, NOI capitalization arithmetic, and ECOA/Reg B credit risk filters.

INTELLIGENCE & MOCK CORE

GEMINI ENTERPRISE AGENT

LIVE MULTIMODAL AI

Gemini 3.7 Flash

Gemini Enterprise Agent Platform

Processes raw scanned PDF/TIFF documents directly with visual bounding-box extraction and ADC authentication.

RAG GROUNDING

Vertex AI Search Grounding

Grounding Attribution Engine

Dynamically retrieves commercial appraisal records and submarket cap rates with clickable citation badges.

RESILIENCE LAYER

Local Encrypted Fallback

In-Memory Redis Cache

Pre-loaded backup document (*Apex Logistics*) and cached lookups guaranteeing zero-crash stage delivery.

Architecture 2: Target Enterprise Production Architecture (Google Cloud + Banking Core)

Target Enterprise Production Architecture: Multi-tier banking integration featuring event-driven core servicing listeners, Gemini Enterprise Agent Platform with multimodal visual layout understanding, Apigee X API gateway security, VPC Service Controls, and deep integration with SEI Wealth Platform and DocuSign.

TIER 1: CORE BANKING & INGESTION LAYER

Bank Core Boundary

CORE SERVICING

AFS & ACBS Loan Servicing
Mainframe / Core Feeds

Inbound payoff statement request documents and daily loan maturity queues.

MESSAGE BROKER

Google Cloud Pub/Sub
High-throughput Event Stream

Publishes payoff request ingestion events to trigger asynchronous processing.

DOCUMENT VAULT

Commercial Credit Vault
Enterprise Content Mgmt

Stores signed incumbency certificates, commercial guaranties, and covenant compliance reports.

TIER 2: AGENTIC ORCHESTRATION & GROUNDING

Google Cloud Banking Enclave

AGENT ORCHESTRATOR

Gemini 3.7 Flash
Gemini Enterprise Agent Platform

Native multimodal layout parsing, unstated parameter identification, and structured planning.

DYNAMIC GROUNDING

Vertex AI Search
Appraisal Vector Retrieval

Grounds property NOI and regional cap rate indices with verifiable document provenance.

DETERMINISTIC MICROSERVICES

Cloud Run Tool Cluster
Containerized Python Services

Hosts CalculatorTool, 1031ExchangeDetector, and ExclusionSentryTool.

TIER 3: ENTERPRISE DATA & RELATIONSHIP GRAPH

Data Persistence Layer

GRAPH & TOPOLOGY

Google Cloud Spanner

Globally Consistent Graph

Maps complex commercial LLC hierarchies, operating entities, and beneficial human guarantors.

ANALYTICS & AUDITING

BigQuery Analytics Vault

Historical Telemetry

Maintains historical payoff tracking, flight pattern telemetry, and model performance metrics.

SECURITY BOUNDARY

VPC-SC & Cloud KMS

CMEK • Service Perimeters

Zero-data-logging boundary protecting confidential banking records under OCC standards.

TIER 4: ENTERPRISE INTEGRATION & ENDPOINTS

Apigee X API Gateway (mTLS)

BANKER CRM

Salesforce Financial Services Cloud

Canvas Integration

Embedded Horizon workspace for Commercial RMs and Private Wealth Advisors.

WEALTH PLATFORM

SEI Wealth Platform Gateway

REST / FIX Integration

Provisions staged account shells, model allocations, and custodial trust accounts.

1031 CUSTODY

QI Escrow & DocuSign Gateway

Dual-ID Immutable Log

Delivers Max\$aver ICS and 1031 Escrow signature packets, recording tamper-evident audit logs.

PART 5: FINANCIAL JUSTIFICATION

The Business Case: Sensitivity & Payback

Horizon's economics rest on conservative assumptions: a \$4.5B annual payoff pool, 78% historical flight rate, a blended 77 bps capture margin (Tier 1 Treasury ICS & 1031 Escrow at 85 bps; Tier 2 Wealth AUM at 65 bps), and an annual enterprise cloud run-rate of \$1.25M.

RETENTION SCENARIO	RETAINED LIQUIDITY	BLENDED VALUE (77 BPS)	OPERATING COST	NET ANNUAL ROI	BREAKEVEN PAYBACK
5% Floor (Ultra-Conservative)	\$225,000,000	\$1,732,500 / yr	(\$1,250,000)	+\$482,500 / yr	8.6 Months
10% Target (Conservative)	\$450,000,000	\$3,465,000 / yr	(\$1,250,000)	+\$2,215,000 / yr	4.3 Months
15% Goal (Executive Target)	\$675,000,000	\$5,197,500 / yr	(\$1,250,000)	+\$3,947,500 / yr	2.9 Months

* Note: Capturing 2.5% of at-risk commercial credits from refinancing away represents ~\$1.35M in additional preserved commercial loan NIM, treated as un-modeled upside.
